

Atlee-Elmont Interchange Project Update

Beginning the week of July 19th, VDOT will begin altering existing traffic patterns. In order to complete construction on the Atlee-Elmont Interchange, traffic must be moved to the new ramps in phases so that old ramps may be removed and the remaining ramps under construction completed. VDOT thanks you for your continued patience as this project nears its completion. Below are the dates and pattern changes to be aware of.

Phase One

- Open Relocated Sliding Hill Road from Route 1 to Atlee Station Road.
- Maintain one lane of eastbound traffic on existing Sliding Hill Road.
- Close the existing onramp from Existing Sliding Hill Road to I-95 North.
- Open eastbound and westbound onramps to I-95 North on Relocated Sliding Hill Road.
- Detour traffic trying to access I-95 South from Relocated Sliding Hill Road. The detour will be posted.

Phase Two

- Close existing southbound I-95 off ramp to Existing Sliding Hill Road.
- Open southbound I-95 off ramps to westbound and eastbound Relocated Sliding Hill Road.

Phase Three

- Sever connection between Existing Sliding Hill Road and Relocated Sliding Hill Road.
- Close the northbound I-95 off ramp to Existing Sliding Hill Road.
- Open northbound I-95 ramps to westbound and eastbound Relocated Sliding Hill Road.

Phase Four

- Close ramp on Existing Sliding Hill Road to I-95 south.
- Open ramp from Relocated Sliding Hill Road to I-95 south.

NOTE: During these phases there may be additional lane closures and traffic shifts.
